DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claim 102 is withdrawn in view of Broadbent (US 6027631 A) on Applicant's Information Disclosure Statement submitted 10 August 2005. Rejections using the reference(s) follow.

Terminal Disclaimer

2. The terminal disclaimer filed on 27 March 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 7,020,537 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 102 is rejected under 35 U.S.C. 102(b) as being anticipated by Broadbent.
5. Broadbent discloses a method in a computing system for automatically configuring parameters controlling operation of an electrochemical deposition chamber to deposit material on each of a sequence of workpieces (col. 5, lines 43-63) to improve conformity with a specified deposition pattern, comprising for each of the sequence of workpieces, configuring the parameters for depositing material on the workpiece based on the specified deposition pattern, the parameters used for depositing material on the

Art Unit: 1795

previous workpiece (i.e., selecting on appropriate shield shape, col. 8, lines 5-18; Fig. 11) and the thicknesses of the previous workpiece after material is deposited on the previous workpiece.

6. Broadbent does not explicitly disclose that the thicknesses are measured; however, since Broadbent discloses a "resulting thickness profile" and compares it to the "desired thickness profile" to modify the shape of the shield (col. 8, lines 44-52), the "resulting thickness profile" inherently is a result of a measured thickness profile and therefore Broadbent anticipates the claim.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NICHOLAS A. SMITH whose telephone number is (571)272-8760. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Susy Tsang-Foster can be reached on (571)-272-1293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
